Summary

Computer Science graduate student graduating May 2027 with three technical internships developing, debugging, and maintaining backend services, REST APIs, and data workflows. Programs in Java, Python, and C/C++ with a strong foundation in data structures, algorithms, and object-oriented design, and experience with AWS, SQL and NoSQL databases (PostgreSQL, ClickHouse, MongoDB), Git, technical documentation, and user-facing web projects.

Education

Arizona State University Aug 2025 - May 2027
Master of Science in Computer Science *GPA: 3.44/4.0*
Recipient of ASU New American University Scholarship

Mukesh Patel School of Technology Management and Engineering, NMIMS 2021 - 2025
Bachelor of Technology in Computer Science and Data Science *GPA: 3.65/4.0*

Work Experience

Aurobindo Pharma USA | *IT Intern* Jun 2026 - Jul 2026

- Developed automated workflows using Microsoft Power Automate to process FDA drug approval communications, extract key application data, validate records, and route information to appropriate stakeholders
- Designed process automation solutions for regulatory and operational workflows and wrote their technical documentation, covering error handling, data validation, and manual review scenarios

Coreties | *Web Development Intern* Jan 2025 - Jul 2025

- Developed backend services and scalable ClickHouse data schemas supporting analytics applications and high-volume data processing workflows
- Collaborated with cross-functional teams to improve data reliability and optimize query performance
- Worked with APIs and structured datasets to extract, transform, and validate data for downstream consumption

Talview | *Software Engineer Intern* May 2024 - Jun 2024

- Developed and debugged backend-integrated application features using REST APIs, PostgreSQL, and SQL
- Identified and resolved application data defects by analyzing inconsistencies and working with engineers
- Supported backend services with structured data handling and reporting needs

Projects

Misère Tic-Tac-Toe (Android Mobile Application) | *Kotlin, Android Studio, Bluetooth, Room DB*

- Designed and implemented an Android application in Kotlin, separating UI, deterministic game-state logic, Room DB persistence, and Bluetooth multiplayer communication into distinct components
- Implemented a Minimax game-tree search with Alpha-Beta pruning for the AI opponent, skipping branches that cannot change the selected move

LeetTrack – Chrome Extension for LeetCode Tracking (link) | *JavaScript, HTML/CSS, Chrome Extension APIs*

- Built a Chrome extension that tracks LeetCode progress with real-time analytics on problems solved, difficulty levels, and topic distribution
- Designed a clean, motivating UI and deployed a public website to explain the tool and onboard users

Factory Farming Data Visualization (link) | *JavaScript, D3.js, HTML, CSS*

- Collaborated on a CSE 578 team building an interactive scrollytelling website that tells the story of factory farming through custom D3.js visualizations
- Worked on data preparation and validation, visual encodings, and the site's narrative structure

Technical Skills

Languages: Java, Python, C/C++, TypeScript, SQL, JavaScript, Kotlin, HTML/CSS

Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, System Design, Testing, Debugging, Backend Development, REST APIs, Frontend Development

Frameworks: React, Node.js, Express.js, Next.js, Django, D3.js, Android SDK, TensorFlow, Keras

Databases: SQL (PostgreSQL, MySQL, ClickHouse), NoSQL (MongoDB), Room DB

Tools & Platforms: AWS, Git, GitHub, CI/CD, Docker, Kubernetes, Linux/UNIX, Postman
